

Healthcare

Healthcare insurance is available to all staff on punctum books payroll. Onboarding happens via the [SimplyInsured portal](#). Note that a direct login doesn't work. Always request a login link via email.

SimplyInsured connects between our Quickbooks accounting system (for automated payments) and the healthcare provider, which currently is United Healthcare.

Each year, the policy renews on May 1, and preceding that United Healthcare does an audit and SimplyInsured sends out an invite for a consultation session.

Files are stored in punctum Accounting > Insurance > Healthcare
