

Biographies

Biographies should be **concise, up to date**, and contain **essential biographical information**. They include, concretely, the following:

- current occupation
- recent monograph or edited collection publications
- a relevant selection of journals where articles have been published
- a relevant selection of current research interests.
- awards

Biographies *do not* include elements such as dates/places of birth, extended CVs, or an exhaustive listing of every single publication ever published.

Monographs and edited collections should be listed in the following format: *Title: Subtitle* (Publisher, year). If there are coauthors or coeditors, these are listed as follows: *Title: Subtitle* (Publisher, year, with N.N.).

Multiple biographies should be arranged alphabetically by surname.

Revision #6
